1 Introduction

This is the first paragraph of the introduction. It contains enough words to wrap onto several lines so that reverse search has to pick the right line inside a paragraph rather than just the paragraph start. Here is some more text on yet another source line to make it longer still.

2 Second

Text from an included file, written on line two of chapters/two.tex. Another line here, line three.

A new paragraph on line five.

$$E = mc^2 + \int_0^1 f(x)\,dx \tag{1}$$

- First item
- Second item with more words
